Rail Vehicle Production Site - Dandenong

With 61 production and engineering sites and 18 service centers in 28 countries, Bombardier Transportation is a global leader in the rail industry. Covering the full spectrum of rail solutions, ranging from complete trains to sub-systems, maintenance services, system integration and signaling. Bombardier's installed base of rolling stock exceeds 100,000 rail cars and locomotives worldwide. With a 39,400 strong global workforce, Bombardier continues a proud tradition of delivering ingenious rail transportation solutions, including:

- **Rail vehicles** - automated people movers, monorails, light rail vehicles, advanced rapid transit, metros, commuter/regional trains, intercity/high-speed trains and locomotives
- **Propulsion and controls** - complete product portfolio for applications ranging from trolley buses to freight locomotives
- **Bogies** - product portfolio for the entire range of rail vehicles
- **Services** - fleet maintenance, operations and maintenance (O&M), vehicle refurbishment and modernization, and material management
- **Transportation systems** - customized "design-build-operate-maintain" transportation system solutions
- **Rail control solutions** - advanced signaling solutions for mass transit and mainline systems

Bombardier Transportation has enjoyed a 60+ year presence in Australia with more than 1000 employees working across in 22 locations. Bombardier's manufacturing hub is headquartered in Dandenong, Victoria, and notably produces the iconic E-Class trams for Melbourne and VLocity DMU's for Victoria's regional network.
