

Signalling Manufacturing and Technology

Hosted by Siemens

SIEMENS

Location: 46 Douglas St, Port Melbourne VIC 3207

Duration: 1.5 hours

Date: 19 May 2016

Cost: Free of charge

Times: 11:00am

Join Siemens for an exclusive tour of the Port Melbourne facility!

Join Siemens for a site tour of their Port Melbourne facility, where you will get to see first-hand how additive manufacturing technologies such as 3D printing are being used in real-life scenarios.

Siemens's experts will take you on a guided tour of the facility, demonstrating a wide range of signalling and control products, answering your questions and explaining how Siemens technology is being used innovatively in the rail industry across Australia's passenger and freight networks.

You will also get to see where Siemens manufactures Australian Made products, specifically designed for the local rail industry.

Transport will be provided for Delegates from the Melbourne Conference and Exhibition Centre.
