126 years of Supplying Points and Crossings in Victoria!

Vossloh Cogifer Australia Pty. Ltd. (VCA) is one of Australia's leading designers and manufacturer of turnouts, points and crossings and special track components, servicing Australian railways since 1879. Its head office, located in Castlemaine is the hub for turnout design and development, and also incorporates one of its two major production facilities, producing turnouts and crossing-work for customers Australia wide.

The tour of VCA's Castlemaine operations will provide an insight into the design, development and production of the turnouts and crossings we utilise every day and are integral to our efficient and importantly, flexible railway operations.

Please wear fully enclosed footwear (no sandals, sneakers, high heels nor open-backed shoes). VCA will provide any other high visibility and / or protective clothing required.

The tour will depart Southern Cross Station by train on the 9:15am service, with a short transfer from Castlemaine Station to the VCA facility. A light lunch will be provided.

Following the tour, Delegates will return on the 12:51 service, arriving back into Southern Cross at 2:22pm.
