

TECHNICAL TOURS

VLocity Driver In-cab Simulator

Hosted by V/Line

Location: 8 Village St, Docklands, Melbourne

Date: 16 May 2016 and 19 May 2016

Times: 9:00am, 10:00am, 11:00am, 1:00pm, 2:00pm, 3:00pm

Duration: 1 hour

Cost: \$5 per person

Capacity: 8 per tour

Transportation: Delegates are required to make their own way to this tour

Experience driving a high speed VLocity DMU on the new Regional Rail Link!

V/Line, as part of planning for the Regional Rail Link project, identified that significant driver training would be required for the new infrastructure, and the many and varied changes to existing infrastructure. Driver training was such a critical component in the timely commissioning of each stage of the project, that 2 purpose built in-cab simulators were established. Route knowledge driver training could be effectively supported by the use of train driver simulator technology, hastening the period for works completion to the commencement of operations.

The V/Line train simulator training centre located in Docklands, Melbourne, and is a short walk from the Melbourne Convention Centre. It includes two in-cab simulators which mimic the look and feel of a VLocity DMU, and a control room. The simulators use leading Computer Based Technology (CGI) to make the corridor virtually real, and the control room can vary signalling to match real world conditions.
